

# Pranav Padmannavar

Minneapolis, MN | (763)-900-3044 | [padma062@umn.edu](mailto:padma062@umn.edu) | [LinkedIn](#) | [github](#) | [Portfolio](#)

## EDUCATION

<b>University of Minnesota Twin Cities</b> <i>Master of Science in Analytics   Minor in Business Management</i>	<i>Sep 2024 – May 2026</i> <b>3.7 / 4.0</b>
<b>Visvesvaraya Technological University</b> <i>Bachelor of Engineering in Mechanical Engineering</i>	<i>Sep 2017 – May 2021</i> <b>3.4 / 4.0</b>

## WORK EXPERIENCE

<b>Daikin Applied Americas   University of Minnesota</b> <i>Data Science and Optimization Intern</i>	<b>Minneapolis, U.S.</b> <i>Aug 2025 – Dec 2025</i>
<ul style="list-style-type: none"><li>Identified \$1.5M+ in projected annual manufacturing cost savings (a 4–5% reduction per unit) by automating the analysis of 2,000+ design parameters and recommending optimal material configurations to the core engineering team.</li><li>Engineered a predictive optimization framework (LightGBM, Scikit-learn) for the flagship "Rebel Applied" rooftop HVAC line, accelerating simulation runtime by 90% (reducing compute time from hours to minutes).</li><li>Saved an estimated 1,000+ engineering hours annually (approx. \$150k in productivity) by enabling rapid validation of complex thermal scenarios, significantly shortening the R&amp;D feedback loop.</li></ul>	
<b>University of Minnesota</b> <i>Graduate Teaching Assistant   IE 3521-Statistics, Quality, and Reliability</i>	<b>Minneapolis, U.S.</b> <i>Jan 2025 – Present</i>
<ul style="list-style-type: none"><li>Advanced the comprehension and practical application of statistics for 150+ students by co-designing course assessments and providing direct mentorship in hypothesis testing, regression analysis, and R programming.</li></ul>	
<b>Data Science and AI Hub   University of Minnesota</b> <i>Instructor   Teaching Assistant</i>	<b>Minneapolis, U.S.</b> <i>Jun 2025 – Aug 2025</i>
<ul style="list-style-type: none"><li>Directed a cohort of 85+ students and mentored 20+ teams through end-to-end AI capstone projects, achieving a 100% completion rate by providing expert consultation on Python, model evaluation, and Responsible AI principles.</li></ul>	
<b>Tata Consultancy Services</b> <i>Data Analyst   Pandora</i>	<b>Bangalore, India</b> <i>Feb 2022 – Jul 2024</i>
<ul style="list-style-type: none"><li>Spearheaded the automation of 30+ mission-critical weekly reports for Pandora's global retail operations (\$4.5B+ revenue p.a.), eliminating 1,000+ manual hrs annually and accelerating strategic decision-making across 100+ markets.</li><li>Engineered scalable ETL pipelines supporting the client's "Programme NOW" digital transformation, reducing data processing workloads by 35% and contributing to significant operational cost reductions in the IT landscape.</li><li>Optimized high-volume SQL queries on multi-terabyte datasets, slashing dashboard response times by 40% to enhance analytics agility for 50+ business stakeholders driving global commercial strategy.</li><li>Fortified data integrity across disparate retail systems by implementing automated validation scripts, improving data accuracy by 15% and mitigating an estimated \$50k+ in annual revenue leakage due to inventory discrepancies.</li></ul>	

## SKILLS

**Programming Languages:** Python, Advanced SQL, R, Scala, Git  
**Statistics & Modeling:** A/B Testing, Causal Inference, Hypothesis Testing, Statistical Modeling, Predictive Analytics  
**Libraries & Frameworks:** Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, Hugging Face, XGBoost, LightGBM  
**Big Data & MLOps:** PySpark, Databricks, Airflow, Kafka, MLflow, Docker, Kubernetes, CI/CD, REST APIs  
**Databases & Cloud:** Microsoft Azure, AWS (S3, EC2, SageMaker), GCP (BigQuery, Vertex AI), PostgreSQL, MySQL  
**Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Data Storytelling

## ACADEMIC PROJECT EXPERIENCE

<b>End-to-End Recommender System</b>	<i>Jun 2025 – Aug 2025</i>
<ul style="list-style-type: none"><li>Engineered a scalable PySpark data pipeline and trained a Scikit-learn collaborative filtering model, forming the core of a system that increased user engagement by 25%.</li><li>Deployed the model as a containerized (Docker) REST API on Azure, serving the real-time predictions that drove the 25% increase in user engagement.</li></ul>	
<b>Demand Forecasting &amp; Inventory Optimization</b>	<i>Aug 2024 – Dec 2024</i>
<ul style="list-style-type: none"><li>Developed a time-series forecasting model to optimize inventory, creating a solution projected to reduce inventory costs by 15%.</li><li>Applied the model to forecast product demand, designing a system that improves order fulfillment rates by 28% through supply chain optimization.</li></ul>	
<b>Stock Market Real-Time Data Analysis using Kafka</b>	<i>Feb 2024 – Apr 2024</i>
<ul style="list-style-type: none"><li>Orchestrated a distributed, real-time streaming pipeline using Kafka and PySpark on Microsoft Azure to ingest, clean, and process live market data.</li><li>Implemented and deployed a Python-based statistical model to analyze the live data feed, achieving 90% prediction accuracy in real-time.</li></ul>
