WORK EXPERIENCE

Daikin Applied Americas

Data Science Consultant

Minneapolis, MN

Aug 2025 – Dec 2025

- Built an HVAC product analytics workflow for chiller configuration studies, using **Python**, engineered simulation features, and **LightGBM** to evaluate **2,000+ design parameters** and surface **\$1.5M+** in savings.
- Reduced product design evaluation time by **90%** by cleaning simulation exports, joining configuration and performance tables, and comparing predicted outcomes against engineering review benchmarks for faster tradeoff decisions.
- Shortened product feedback loops and reduced **1,000+ annual engineering review hours** by creating validation checks, ranked scenario outputs, and decision-support summaries for HVAC design tradeoffs.

Tata Consultancy Services | Client: Pandora

Data Scientist, Retail Analytics

Bangalore, India

Feb 2022 – Jun 2024

- Enabled scalable customer, sales, and KPI analysis across a **\$4.5B global retail business** by replacing **30+** manual reports with **Python**, **SQL**, scheduled workflows, reusable metric logic, and dashboard-ready datasets.
- Accelerated recurring business reviews and reduced processing workloads by **35%** by rebuilding validation pipelines in **Azure Logic Apps**, **Azure Functions**, and **SQL** for automated daily KPI refreshes.
- Improved dashboard response times by **40%** by optimizing customer transaction joins, filters, aggregation logic, and KPI calculations across **multi-terabyte retail datasets** used for weekly regional leadership reviews.
- Improved reporting accuracy by **15%** and mitigated **\$50K+** in revenue leakage by flagging missing transactions, sales anomalies, reconciliation gaps, and data quality breaks across reporting pipelines.
- Uncovered a **12% regional growth opportunity** by translating customer behavior signals into model-driven KPI analyses, **Power BI dashboards**, and business review summaries for **50+ stakeholders** across global retail markets.

University of Minnesota

Graduate Teaching Assistant

Minneapolis, MN

Jan 2025 – May 2026

- Guided **20+ applied AI capstone teams** and **230+ students** by helping frame analytics problems, define success metrics, conduct **EDA**, and build statistical modeling workflows.
- Improved project delivery quality by reviewing **Python**, **R**, machine learning logic, experiment design, metric interpretation, and **Responsible AI** considerations for stakeholder-ready presentations.

SKILLS

Programming & Data: Python, SQL, R, Pandas, NumPy, Git, Jupyter Notebook

Product Analytics: KPI Design, Funnel Analysis, Cohort Analysis, Retention, LTV, Customer Segmentation, Data Storytelling

Experimentation: A/B Testing, Experimental Design, Causal Inference, Hypothesis Testing, Regression, Campaign Lift Analysis

ML: Scikit-learn, Propensity Modeling, Recommendation Systems, Classification, Clustering, Feature Engineering, Model Evaluation

BI & Data Platforms: BigQuery, PySpark, Databricks, Tableau, Power BI, Looker, Streamlit

AI Tools: RAG, OpenAI API, SentenceTransformers, FAISS

PROJECT EXPERIENCE

E-Commerce Product Analytics – [Link](#)

Apr 2026 – May 2026

- Diagnosed e-commerce funnel drop-offs, cohort retention, and campaign lift across **270K+ users** by building **BigQuery SQL** data marts, **Python** analyses, and **Tableau** dashboards for conversion, revenue, and product metrics.
- Improved targeted purchase prediction with **15.8x PR-AUC lift** by combining **propensity modeling**, **A/B testing**, feature engineering, revenue diagnostics, cohort-level validation, and a **RAG** KPI copilot for experiment interpretation.

Reorder & Cross-Sell Analytics – [Link](#)

Jun 2025 – Aug 2025

- Modeled Instacart reorder behavior and next-basket product demand across **30M+ interactions** by building **PySpark** and **Databricks** pipelines for customer features, segmentation, and retention analytics.
- Identified cross-sell and product-affinity opportunities using **FP-Growth**, reorder classification, and segment profiling, achieving **0.830 ROC-AUC** and **58% Recall@10** across customer, product, and aisle cohorts.

Sentiment & Engagement Analytics – [Link](#)

Sep 2025 – May 2026

- Delivered product-ready sentiment and engagement insights by building an **NLP analytics platform** that categorized **20K+ comments** into occupation segments, severity themes, and dashboard-ready trend views for product decisions.
- Predicted high-engagement discussions with **0.848 ROC-AUC** using custom taxonomies, **SentenceTransformers**, **BERTopic**, metadata features, and interpretable drivers to explain themes, reactions, and sentiment shifts.

EDUCATION

University of Minnesota Twin Cities

Master of Science in Analytics — Minor in Business Management

Sep 2024 – May 2026

GPA: 3.7 / 4.0

Visvesvaraya Technological University

Bachelor of Engineering in Mechanical Engineering

Sep 2017 – May 2021

GPA: 3.4 / 4.0
